Edition #5

QUAD & UTV CABS • QUAD ACCESSORIES • CUSTOMISED • INNOVATION • SAFETY

Welcome to

TRAX Equipment™

agricultural innovation

Providing safe solutions to get more out of your gear

Introduction

TRAX Equipment™ is a brand of Ag-Tech Industries, and specialises in offering solutions to help you achieve whatever your objective is on your quad or UTV.

Marked by innovation, we offer unique attachments for getting the job done, to luxury items to make it more enjoyable, we are committed to providing the absolute best we can in terms of quality, price and service. TRAX Equipment™ offers a range of full cab, windscreen and roof options for quads and UTVs. Aimed at a gap in the market for well-priced, high quality, practical and locally (NZ) made product, we are committed to providing the absolute best we can in these terms, and to help you get the most out of your gear. We also have a range of imported accessories, in order to provide the best possible solution for your requests.

Well into our third decade, we feel TRAX Equipment™ is now widely known as the leading brand of aftermarket quad and UTV parts in New Zealand and our mission is to continue moving with the changing market.

Yours faithfully

Vernon Suckling
Managing Director

Have you got a need for your
Quad or UTV?

Ask TRAX and we'll see what
can be done.

TRAX guarantee

We guarantee our TRAX Equipment™ products to be of the highest quality and value. Any TRAX product is covered against any faulty parts or workmanship for 12 months from the date of purchase. This does not cover wear from normal use, or any issues caused by misuse, modification or improper maintenance of the product. Some of the imported brands we support have their own terms, and we guarantee to support and provide solutions to any problems if they arise.

The TRAX mission

The TRAX Equipment™ mission is to continue providing quality New Zealand made products, and innovative solutions to the agricultural market.

Our goal is to move with the changing market, through our own manufacturing capabilities and international sourcing, in order to provide the gear that UTV and quad riders need.

Ordering TRAX gear

Check out our products in this catalogue, or online at www.traxequipment.co.nz and note the code and/or description of the product you are after. Contact your local motorcycle dealer with the parts you need, and if they don't have them in stock they will order it in for you. If you are uncertain as to your closest dealer, feel free to contact us and we will guide you to them. Products such as quad and UTV cabs, are sold exclusively through dealers, unless some other agreement has been made.

ALL PRICES ARE NZD\$ & RETAIL inc GST

Not just limited to crooks! Equally suitable for shovels, Cattle sticks, Walking sticks, Fishing rods etc.

#609	Crook Holder & Mounting	\$79.99

The TRAX Story

agricultural innovation

History

Ag-Tech Industries Ltd manufacturers of TRAX Equipment™ and LIFEGUARD™ products is a family owned business which started operating in 1972 in the basement of our family home. It now spans three generations and operates from a purpose built 2000m² factory. In earlier times (then trading as 'Ranchware') we were supplying and manufacturing stock saddles for land & survey Blocks and sheep stations throughout New Zealand.

Development

Having farm experience, a manufacturing background and a pioneering spirit, Ag-Tech Industries were always looking forward and designing new products wherever there was a need. During the 'Ranchware' days, we made more than 800 stock saddles. This is now a past era and we saw a need to move with the times which led to a change of direction and the introduction of the 'Quad-Pod™' in 1991. This was an innovative first and still being made today 23 years later, along with a comprehensive range of other quad and UTV accessories.

Results

As UTVs came on the market, this resulted in demand for further accessories other than what was available for quads. As our cab range began to grow from the original Quad-Pod™, TRAX Equipment™ was born. This has now resulted in an innovative range of New Zealand made and imported products, providing solutions for farmers to get the most out of their gear and make the job more efficient.

Keep it local and buy a New Zealand TRAX cab.

- Parts readily available
- Changes can be made
- Will last the life of your vehicle

The Quad-Pod™

On the market for over 25 years, the Quad-Pod™ is still available and with original units still going strong. Simple & quick to mount, the Quad-Pod™ will transform your bike into an all seasons, all weather, quad.

Got a Quad-Pod? Send us some photos of it in action!

Here's what Mr Churchward from Geraldine had to say:

"My Quad-Pod™ is about 15 years old, and I have had it on 3 bikes. Over this time it hasn't caused me any trouble, and seems to outlast my quads! Running a sheep and cattle farm in Geraldine, I have found it has excellent weather protection, keeping the cold winds and rain off me, and also keeping my tools and equipment dry."

I would recommend the Quad-Pod™ to any farmer, as it makes the job more enjoyable on those cold wet days, keeps the weather off gear that doesn't need to get wet, and they last well - 15 years and still a lot more use to be had out of it."

P. Churchward, Geraldine

'Pro-Pod' Quad Cab - lightweight alloy model

OPTIONS

DELUXE: Includes an aluminium frame which clamps easily to front & rear carriers without the need of tools. Super light at less than 20kg's, it is specially designed to spread the weight on both carriers to provide minimum stress on the bike. High tensile aluminium is used for extra strength and durability, along with the Windscreen being made with toughened safety glass.

The Deluxe model features a strong plastic toolbox (black or red), tough Polycarbonate side-flares, and a heavy duty PVC canopy hood which can be rolled up at the back. Roller doors and wiper can be added if desired. Folds up flat which makes it easy to store if need be.

#PP500 Deluxe Pro-Pod Cab \$1830.00

ECONOMY: This model has a clear PVC front skirt in place of the Toolbox as an economical alternative and is an advantage if the Quad has a central mounted headlight. Can be rolled up if desired.

#PP501 Economy Pro-Pod Cab \$1660.00

OPTIONAL EXTRAS

WINDSCREEN WIPER KIT: Additional to the Pro-Pod, the kit includes Italian made motor for superb quality and durability, wiring and a heavy duty arm and blade. The Pro-Pod comes with the mounting bracket already attached, so a Wiper Kit can be added at any time.

#PP502 Windscreen Wiper Kit \$415.00

WINDSCREEN WASHER KIT: Essential in dry/dusty conditions, can be mounted in any available space on the Quad. Container has a capacity of 1.3lt, includes 12v pump, pipes, connections and double nozzles. Helps to extend the life of the Wiper.

#208 Windscreen Washer Kit \$110.00

ROLLER DOORS: Clear PVC spring loaded roller doors pull across from back and return when released. Mounting may vary on different makes.

#PP503 Roller Doors \$525.00

#PP500 (Wiper not inc)

CF Moto U8 - 2014+

The CF Moto U8 cab fits onto the existing roll frame, and is made to suit the 2014 and later models. It has been designed to fit with the factory roof. The options include a toughened safety glass windscreen, with a lower front PVC skirt and clear PVC side flares along with a wiper kit, PVC clear back panel, rubber mats, mud flaps and front mud guard flares. **Note: A TRAX roof has not been developed for the U8, and the factory roof is not included in any prices.**

ACCESSORY OPTIONS:		
#CF101	Deluxe Windscreen Kit	\$1006.00
	(Windscreen, PVC skirts & side-fenders)	
#CF100	Windscreen Kit	\$741.00
	(Windscreen & PVC skirts)	

EXTRAS

Kioti Mechron 2200

The Kioti 4x4 UTV windscreen kit mounts to the existing ROPS and fits with the factory plastic roof, or a TRAX roof is also available.

Designed to look the part and add life and value to your vehicle, it comprises of a toughened safety glass windscreen, rubber PVC bonnet skirt & top seal with a pair of rigid polycarb side flares (deluxe).

Optional windscreen wiper kit, spring loaded roller doors and a PVC back panel are available and can be added at any time.

CAB OPTIONS:

#KO662	Deluxe Windscreen kit	\$1283.00
	(Windscreen & side-fenders)	
#KO663	Windscreen Only kit	\$960.00
#KO663W	Windscreen & Wiper	\$1299.00

	(TRAX roof, windscreen & side-fenders)	
#KO661	Economy Cab kit	\$1425.00
	(TRAX roof & windscreen)	

EXTRAS & REPLACEMENTS:

#KO664	Wiper Kit (Italian)	\$416.00
#KO665	Clearback	\$267.65
#KO666	Roller Doors (Pair)	\$552.40
#KO667	Side-Fenders (Pair)	\$346.48
#KO668	Windscreen Washer	\$127.15
#KO669	Rubber Deck Mat	\$206.95
#KO679	Replacement Windscreen	\$385.65

ROLLER DOOR INFORMATION:

For the roller doors to function correctly, and if you have a factory roof fitted, it will need to be attached with the curve of the roof is at the front, as shown in the photo on the right.

The TRAX polycarbonate side-fenders are also needed for the doors to operate at their maximum potential, and these simply attach to the TRAX windscreen frame.

The doors are priced per pair, but if you only need one side, TRAX can handle that, and specially make a single door for the side you need.

Replacement parts are also available, so if the PVC tears or some other part fails, you won't need a whole new door, and because they are made right here in NZ, TRAX will fix them free of charge within 12 months from the date of sale.

Deluxe windscreen kit + clearback (shown with factory roof)

Deluxe cab kit + clearback & doors (shown with TRAX roof)

Wiper kit (Italian motor)

Roller doors & side-fenders (shown with factory roof)

Carrier Trays & Racks

QUICK CARRIER

An extremely effective way of handling a small calf or sheep on a Quad; (any farmer will know how difficult this job can be with no assistance)! The reinforced PVC sling holds calves from new-born up to three weeks old securely and comfortably. Straps and buckles to hold the animal in place. Space between cut-outs 435mm(L) x 180mm(Bk) x 150mm(Ft).

Cows will follow willingly as they can see and smell the calf. Universal mounting ensures easy and quick fitting onto most makes & model of Quad.

#62	Quick Carrier Complete	\$347.00
#63	Replacement PVC Sling Only	\$131.00
#57	Replacement Steel Frame Only	\$207.00

TRAX 'DURO-DECK' CARRIER TRAYS

Close to indestructible! Made of heavy duty polyethylene plastic they will never break down or disintegrate. Does not absorb water like some of the rubber mats.

DURO-DECK STD TRAY

- Sandblasted finish to provide extra grip
- Holes to tie down loads
- Low front edge is comfortable to sit on
- 1160mm x 485mm x 35mm - 25mm (behind seat 300mm)

#160a	Duro-Deck Standard Tray	\$145.00

BUNGI LOAD SECURE (additional to STD tray)

Crisscrossing bungi cords are a handy way to firmly secure loads of all shapes. Can be easily re-arranged and tensioned to suit simply by using a different combination of holes.

#160b	With Bungi Load Secure	\$154.00

DURO-DECK DEEP TRAY

- Deep lip is great for holding tools, salt blocks, etc
- Holes can be drilled as STD tray if desired
- 1160mm x 485mm x 70mm (behind seat 300mm)

#161	Duro-Deck Deep Tray	\$195.00

BUNGI LOAD SECURE ONLY

#162	Bungi Load Secure Only	\$10.70

NOTE: All trays come with heavy duty cable-ties for mounting. Red tape only included if requested.

#XP116	4500lb Winch & Mount (KFI)	\$995.00
#208	Windscreen Washer	\$111.30

ROLLER DOOR INFORMATION:

These doors have been designed to fit with the TRAX roof, and the TRAX polycarbonate side-fenders are needed for the doors to operate at their maximum potential - these simply attach to the TRAX windscreen frame. The doors are priced per pair, but if you only need one side, TRAX can handle that, and will make a single door for the side you need. Replacement parts are also available, so if the PVC tears or some other part fails, you won’t need a whole new door, because they are made right here in NZ & TRAX will fix them free of charge within 12months from the date of sale.

Carrier Rack Extension

These American made racks are a great way to increase the carrying capabilities on a quad without taking up the carrier space in the way a tray or box does.

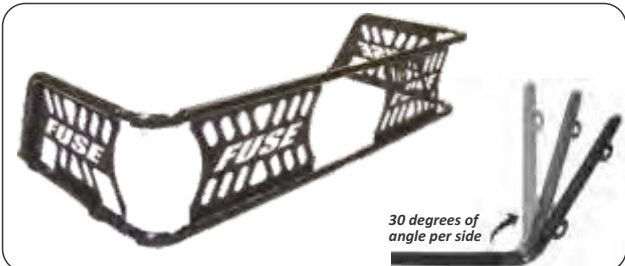

Adjustable to suit most Quad’s with tubular carriers. The Rack folds flat for handy storage and are made from strong, powder-coated steel tube with steel support plates.

As well as their usefulness they look great on the quad!

Features include:

- Unique adjustable with feature with strong locking buttons
- Adjustable corner angle (up to 30°) fits almost any tubular carrier
- Universal hardware (inc) works on most carriers – ‘J’ Hooks with thumbscrews

#784	‘FUSE’ Rear Carrier Extension	\$199.00

30 degrees of angle per side

Need something special made from rubber?

Ask TRAX and we’ll see what can be done...

CARRIER REINFORCING BRACKETS

These brackets bolt to the top of the shock absorbers to strengthen the carrier mounting lugs.

They are zinc coated, 4 styles designed for various Hondas, and are priced in pairs.

#QP101a	TRX350/TRX420	\$39.80
#QP101b	FOREMAN	\$39.80
#QP101c	TRX500	\$39.80
#QP101e	2014+ TRX420/TRX500	\$39.80

WELD-ON CARRIER REINFORCING BRACKETS:

A cheaper alternative with these bare steel brackets - right ready to weld into place and be painted once done. They have an M8 nut welded into them, and are priced per piece. Suit the TRX500 and maybe other models.

#QP101d	Weld-On Carrier Brackets	\$12.30 ea

Electrical Accessories

EXTENSION CORD

The Extension spiral cord and adaptor plug is suited for the cigarette lighter sockets and is a useful way to connect the Stock Alert or spotlights, chargers, or your cab windscreen wiper etc.

- Available with or without the on/off switch on the plug.
- #89a   *Spiral Cord - No On/Off Switch*   \$42.00
  - #89b   *Spiral Cord - With On/Off Switch*   \$49.00

POWER/CIGARETTE LIGHTER SOCKETS

12V Power Sockets are available for Quad's which don't have one pre-fitted, or to replace a damaged one.

With four different mounting options, the sockets can be placed almost anywhere on the bike quite easily.

- #87a   *Power Socket - Rectangle*   \$32.50
- #87b   *Power Socket - Circular*   \$32.50
- #87c   *Power Socket - Threaded*   \$39.40
- #87d   *Power Socket - Flat base*   \$49.80

12V UNIVERSAL CONNECTOR

The 12V Universal Connector is a two pin plug and socket. Suitable for a wide variety of uses for Quad bike electrical applications. The rear opening can be trimmed wider to take larger wire. Includes both plug & socket.

- #81   *12V Universal Connector*   \$24.50

Lights & Spotlights

HANDHELD SPOTLIGHT

Powerful, compact and comfortable hand-held spotlight with 12V plug in adaptor and a 3.5m spiral cord.

#266	Handheld Spotlight	\$116.00
#268	Replacement Bulb	\$29.00

SPOTLIGHT HOLDER

Quick grab holder can mount to handlebars or carrier and can be swivelled 360°. Arms are adjustable to fit other brands of spotlight.

#267	Spotlight Holder Only	\$112.00
#269	Spotlight & Holder	\$198.00

'STOCK ALERT' REVOLVING BEACON

Industrial and powerful revolving traffic beacon will instantly alert road users of potential hazards. This is essential when driving stock on the road, at night or where other people may be present. Heavy duty polycarbonate case will resist stone chips and is even likely to survive a roll over!

The complete option (**Code#88**) comes mounted on a steel base pole 600mm high and includes 2m of cable.

#88	'Stock Alert' Complete	\$309.00
#91	Base Pole Only (Made in NZ)	\$165.00
#92	Revolving Beacon Only	\$156.00
#93	Replacement Bulb	\$11.80

FLASHING STROBE LIGHT

Very low currant draw of 0.3amps, meaning it can be left going when the Quad is parked without draining the battery! This is a compact, durable beacon in an almost unbreakable polycarbonate case which delivers a constant piercing flash.

The Strobe light complete option (**Code 183**) comes mounted on a steel base pole which stands 750mm off the carrier and includes 2m of wiring cable.

#183	Strobe Light Complete	\$240.00
#184	Base Pole Only (Made in NZ)	\$95.00
#185	Strobe Light Only	\$145.00
#186	Replacement Bulb	\$32.90

John Deere XUV550

This cab fits the XUV550 and most parts have also been made to suit the factory roof. The windscreen fits on the existing ROPS, and comprises of toughened safety glass windscreen attached to a steel frame with black rubber front skirt's and rigid polycarb side-fenders. Optional extras include spring loaded roller doors, windscreen wiper kit, clear PVC back panel and a windscreen washer kit which can be added at any time.

Note - to fit roller doors, the TRAX roof, windscreen and side-fenders are recommended as they don't function correctly with the John Deere factory roof and windscreen.

CAB OPTIONS:		
#JD550	XUV550 Windscreen Kit (for the factory JD roof)	\$899.00
#JD551	XUV550 Deluxe Windscreen Kit (Windscreen & side-fenders for the factory JD roof)	\$1200.00

#JD565	XUV550 Replacement Windscreen	\$357.00

John Deere XUV

The cab fits the John Deere XUV 625i/825i/855d as well as the older HPX. It attaches to the existing ROPS, and comprises of a sturdy polyethylene plastic roof, toughened safety glass windscreen, black PVC front skirt and PVC side-fenders. Optional extras include spring loaded roller doors, windscreen wiper kit, clear PVC back panel and a windscreen washer kit which can be added at any time.

These accessories also fit the older HPX, but due to slight design changes we would need to know if it is a HPX model, or 2012 and older XUV or 2013+ XUV. The prices and part numbers for each option remain the same.

Note - to fit roller doors, the TRAX roof, windscreen and side-fenders are recommended as they don't function correctly with the John Deere factory roof and windscreen.

CAB OPTIONS:

'De-CRAP-It'

QUAD SCRAPER BLADE

THE REVOLUTIONARY TOOL FOR THE DAIRY INDUSTRY
The mini 'De-CRAP-it' is designed specifically for Quads and is a highly efficient tool for many uses. Dairy farmers report huge savings in wash down time and water consumption.

It has a generous 1.8m wide sweep, a height adjustable rubber scraper and has been carefully designed to push from the rear tow-bar without putting excessive stress on the quad in any way. Great for cowsheds and yards, raceways, stock underpasses, cattle or farm yards, chicken barns; Also effective for gravel, sawdust, snow etc.

An electric winch is not required as it has its own innovative lift handle, however a winch can be fitted for ease of operation if preferred, at an additional cost.

The 'De-CRAP-it' will fit most Quads such as Hondas & Suzuki's, but may need extra fittings for types such as the Polaris models.

Mounting brackets on their own are available, so if you want to use the blade on more than one quad, all you need is an extra set of mounts and will save a lot of time transferring it from one to the other. Once these mounts are attached and the blade is assembled, it only takes moments to hook up the blade to use, and to detach once finished.

#890	Mini 'De-CRAP-It' Blade	\$2185.00
	Winch (Optional) see page 28	

Gun Racks - Quad

'PACK RACK' ATV GUN & BOW SERIES (USA)

Likely to be the most reliable, durable & popular Gun Racks you will find anywhere, find out for yourself! Quality USA made, designed for mounting to the handlebar or carriers of quads.

SINGLE POINT MOUNTING GUN RACK

One piece design mounts at only one point, allowing you to put this rack anywhere on your ATV's rack or rail. Holders can be slid to correct width and tightened to custom fit whatever item you need to carry. Unique compression rubber 'honeycomb' keeps your gear held tight and comes with rubber snubbers for use in rough terrain. USA made.

SEEFARI® MONOPOD

See farther with the Seefari®, the original ATV mounted monopod. With all of the vertical and horizontal adjustments of a standard tripod, the Seefari® can be used with spotting scopes and cameras (35 mm and digital) as well as mini 8mm and VHS-C camcorders. Quick release plate allows for easy removal of scope or camera.

The Seefari® extends from 9 inches to 12 to help view or film at a comfortable angle. 360 degree rotating head also pivots 180 degrees up and down to provide full viewing and filming capabilities. Aluminium mounting block attaches securely to handle bars or ATV cargo rack rails up to 1" in diameter.

#205   **Seefari® Monopod**   **\$132.25**

Hand Mitts & Guards

QUAD BIKE HAND MITTS

A great winter product and essential in the frosty regions. Our own **TRAX Equipment™** brand with unique design and materials, these Hand Mitts are every riders answer to numb hands on cold, frosty mornings!

They eliminate the need for bulky, unpractical gloves. Padded insulation and durable material keeps out the cold and holds the muffs from sagging down.

Will fit most quads with their effective and easy system for attaching. The L/H side just has velcro, a strap & buckle which can be pulled tight to seal off around the bars. The R/H side has a cut-out for brake cylinders which domes together, and then the same velcro, strap & buckle as the L/H side to seal off. Available in black/red or just black.

- #496
- Black Hand Mitts (Pair)
- \$65.00
- #497
- Red/Black Hand Mitts (Pair)
- \$65.00

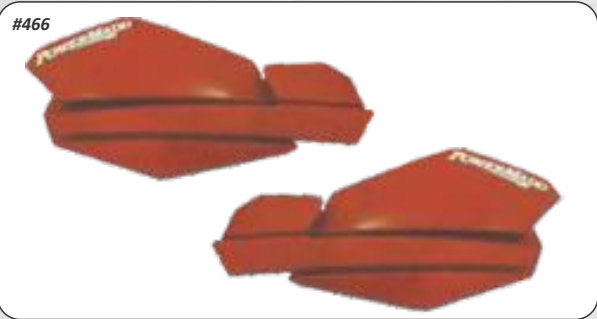

POWERMADD HANDGUARDS

The popular ‘Trail Star’ Handguards are made by the same American factory as the Cobra windshields. Designed to take a beating, they will protect your hands from whatever nature throws at them in the way of flying debris, rocks, bushes, branches and mud, as well as keeping off wind chill in the colder months.

Supplied with a universal mounting kit, these will attach to most Quads and 2-Wheelers. This kit has a slight bend in the mounting brackets which flares the end of the handguard out away from the handlebar, providing more room for clutch and brake levers.

Note - will not fit on Yamaha Grizzly '07-current

- Colours available: Red, Black or Blue (please specify on order)
- #466
- ‘Trail Star’ Handguards
- \$70.00

Mule PRO FXT - 6 Seater

The Kawasaki Mule PRO FXT cab kit mounts to the existing ROPS. Designed to look the part and add life and value to your vehicle, it comprises of a heavy duty soft PVC roof, toughened safety glass windscreen, PVC bonnet skirt which can be domed open to allow airflow, and a pair of rigid polycarb side-fenders (included in Complete & Deluxe kits).

There is also a Roof Only kit, which is same as the roof included in the cab options, with all mountings and support bars needed included in the kit.

There are two different ‘clear panels’ for this model – one for the back as usual, but the middle one is a slightly different design, and has been developed for if the machine is being used as a 3 seater.

Heated Accessories

Don't let the cold cause an unpleasant riding experience! All American products, these are the highest quality available and made for easy fitting and use. Adjustable levels of heat and designed for all standard ATVs.

HAND GRIPS:
As your hands are one of the main exit points of body heat, these heated grips will soon become your new best friend on those frosty mornings! Glue on style. No more numb, stiff, unusable fingers!
#795 Heated ATV Hand Grips (Pair) \$110.00

SEAT HEATERS:
These heat pads slip under your seat cover size 200mm x 230mm. Comes complete with cable. On/Off switch - 20w, 12v. You'll be amazed!
#608 ATV Seat Heater \$99.00

HEATED VEST:
This high performance vest is a stand-out ultimate accessory for any rider. Unique collarless design to easily fit under any jacket, removable heater pad for easy washing, adjustable S to XL size, lightweight, carbon fibre heating elements, heats the chest & back (where it counts!)
#796 Heated Vest \$267.00

HEAT CONTROLLERS

This is what you need to make most your heated accessories go, and are listed separately due to the options available to suit your requirements.

'QUAD-ZONE' CONTROLLER:
Multiple ports for those with two or more accessories, all of which can be plugged into this. Control each item separately, with 5 levels of heat!

A unique feature of this controller is its 'memory' which allows it to go back to previous heat settings when powered up after the machine was turned off prior.
#798 Quad-Zone Controller - Multi Port \$295.00

SINGLE ZONE CONTROLLER & USB CHARGER:
An economical controller for any single heated accessory. 5 levels of heat, also has the unique feature of a USB port for charging most cell phones, MP3 players etc!
#797 Single Zone Controller/USB \$120.00

ATV Mudflaps, Quad Locks & Covers

TRAX ATV MUDFLAPS

Trax ATV Mudflaps are extremely durable, made with a high grade Plasflap material, resistant to all extremes and with the perfect flexibility suitable for their job.

ADDITIONAL MTG KITS: These consist of aluminium plates, reinforced 4mm PVC straps and bolts and come pre-assembled ready to easily and quickly mount to the back carrier bar.

Special additional Mtg bars are necessary for use on some quads and UTV's, designed for Polaris quads and John Deere Gators.

#48	ATV Mudflap	
	MED 335 x 620 mm (Pair)	\$45.00
#49	ATV Mudflap	
	LGE 380 x 620 mm (Pair)	\$49.00
#50	Mudflap Mtg Kit – Assembled	\$39.90

QUAD LOCK

Made here in New Zealand, is a great option for extra security for your ATV. The hooks are made from carbon steel to maximise strength and quality and can be adjusted to get the tightest locking position. Can fit most model quads, and is easy to keep one on hand being so compact. Try pushing your quad with the handle bars full-lock and see how far you get...

Models it may not work for:
Quads with plastic guards around the bottom of the handle bars, the Quad Lock proves ineffective, due to not being able to keep the ATV at full-lock.

Available in Red/Blue/Yellow		
#906	ATV Immobiliser 'Quad Lock'	\$198.00

QUAD COVER

PROTECT YOUR ASSETS! Available in two grades of fabric, these waterproof drop over covers offer all year round protection from all elements ensuring a longer life and a lasting 'newness'. Universal Quad fit, includes eyelets for tie-downs if required.

#65	Quad Cover – 10oz Polycotton	\$450.00
#66	Quad Cover – Plain PVC	\$329.00

Kawasaki Mule Cont...

KAWASAKI MULE TRANS ACCESSORIES

The Mule 4010 TRANS Cab has the same windscreen unit as the 4010 soft top cab which simply clamps onto the roll frame. A plywood roof provides a rigid base for the PVC roof to stretch over, spanning all four seats.

Can be used in either the four or two seat configuration, roller doors are available for the rear seats as well as the usual optional extras.

OPTIONS:		
#KM522	Mule 4010 Trans Cab Deluxe	\$2003.65
	(PVC roof & support panels, windscreen, side-fenders)	
#KM522B	Mule 4010 Trans Cab Economy	\$1665.60
	(PVC roof & Support Panels, Windscreen)	
#KM113B	Mule Trans Clear PVC Cab Back	\$ 336.49
#KM115B	Mule Trans Rear Roller Doors (pair)	\$ 489.40

KAWASAKI MULE 600/610 ACCESSORIES

The Mule KAF600/610 Cab fits onto the existing roll frame. It comprises of a sturdy polyethylene plastic moulded roof, steel hinging windscreen frame supported by gas struts, toughened safety glass windscreen, lower front PVC bonnet skirt and clear PVC side flares. Available with optional wiper, back panel and roller doors, plastic roof can be purchased alone for overhead protection if desired.

OPTIONS:		
#KM288	Mule 610 Complete Cab	\$2783.70
	(Roof, windscreen, side fenders, gas struts, wiper, doors, clear back)	
#KM289	Mule 610 Deluxe Cab & Wiper	\$2447.20
	(Roof, windscreen, side fenders, gas struts, wiper)	
#KM290	Mule 600/610 Cab Kit Deluxe	\$2116.80
	(Roof, windscreen, side fenders, gas struts)	
#KM314	Mule 600/610 Cab Kit Economy	\$1962.35
	(Roof, windscreen, gas struts)	
#KM304	Mule 600/610 Windscreen Kit	\$1596.35
	(Windscreen, side fenders, gas struts)	
#KM291	Mule 600/610 Wiper Kit (Italian)	\$417.55
#KM292	Mule 600/610 Clear Back Panel	\$252.35
#KM293	Mule 600/610 Roller Doors (pair)	\$513.90
#KM296	Mule 600/610 Roof Only	\$512.40
#KM301	Mule 600/610 Roof U-Bolt Kit	\$ 41.30
#KM295	Mule 600/610 Replacement Glass	\$334.95

NB: Standard 4010 parts such as wiper kit, front roller doors, replacement glass & winch mount also fit the TRANS.

Kawasaki Mule Accessories

KAWASAKI MULE 4010 ACCESSORIES

HARD TOP CAB:

The 4010 hard top cabs feature a tough polyethylene plastic roof, polycarbonate side flares and a hinging windscreen for access to bonnet. This is a very popular cab, available with windscreen wiper and washer, roller doors, clear PVC back and gas struts to support the windscreen when lifted for bonnet access or to shoot from etc. These items are optional with a cab and can be added at any time, cab also available with no sides (economy) or a roof only kit for overhead sun and rain protection only.

SOFT TOP CAB:

The Mule soft top cabs have been sold since 2004. There have been a few modifications and improvements over the years, and replacement parts are still available for earlier models. Gas struts are not needed for this cab, as the windscreen sits high enough for the bonnet to be lifted without hitting it. Roof consists of heavy duty PVC and is supported by aluminium slats. This cab is very quick and simple to fit, and is also available with no sides (economy).

CAB OPTIONS:

#KM 519	4010 Hard top Deluxe Cab	\$1836.90
	(Roof, windscreen, side-fenders)

#HO556   MUV Wiper arm only   \$60.60

Deluxe cab - roof, windscreen & side-fenders, shown with optional extra wiper kit and clear back panel

Honda Pioneer 700 Accessories

The hard roof & windscreen fit both the 4P & 2P models. A soft-top rear roof can be fitted on the back of the 4P - this attaches to the hard roof, and can be quickly removed if need be. There is a soft-top cab option that fits the 2P only. The windscreen has space for two wiper kits, and the lower PVC skirt is removable to help with airflow. The clear back panel fits on both models, and also works on the back of the 4P. The roller doors fit both models, are made to suit the front only and work best with side-fenders attached. Polycarbonate ½ screen fits both models and simply bolts in place with mounting brackets provided.

CAB OPTIONS:

#HO2P2   700 Deluxe Kit, Wiper   \$2751.00
(Hard Roof, Glass Windscreen, Side-Fenders, Wiper)
Fits the 2P & 4P - rear roof for 4P can be added at any time

#HO2P3   700 Economy Kit   \$1498.00
(Hard Roof & Glass Windscreen)
Fits the 2P & 4P - rear roof for 4P can be added at any time

#HO2P4   700 Roof Kit   \$550.60
(Hard Roof & Mounting)

#HO4PST   700 4P Rear Roof   \$480.25
(Rear Black PVC Roof & Support Bars)
NOTE - TRAX hard roof needs to be fitted for this to attach.

#HO2P2ST   700 Soft-Top Deluxe, Wiper   \$1927.00
(PVC Roof, Glass Windscreen, Side-Fenders, Wiper)
NOTE - Only fits the 2P model

EXTRA ACCESSORIES:

#HO2P6   700 Roller Doors (pair)   \$520.00
#HOP50   700 Wiper Kit (Italian)   \$420.60
#HOP51   700 PVC Clearback Panel   \$229.40
#HOP52   700 Polycarb Side-Fenders   \$344.15
#HOP53   700 Polycarb ½ Screen   \$443.55
#HOP54   700 Rubber Floor Mat   \$113.20
#HO2P7   700 Rubber Deck Mat - 2P   \$130.00
#HO4P7   700 Rubber Deck Mat - 4P   \$168.25
#101150   700 Winch Mount   \$198.80

REPLACEMENT PARTS:

Throttle Extender, Tow Balls

‘THUMBUDDY’® PRO THROTTLE EXTENDER

Fatigued, aching thumbs when riding? This is not an unusual complaint and many people who have fitted the ‘THUMBUDDY’® THROTTLE EXTENDER have not been able to believe the difference!

Designed to attach to the existing thumb throttle to increase leverage, can be bent to suit the riders hand perfectly. Quick and easy to attach with stainless steel segments that clamp together to provide reliable and comfortable throttle control.

#262   Pro ‘Thumbuddy’®   \$34.00
Throttle Extender

TOW BALLS

Precision made to the highest quality and standard, these are likely to be the most economical tow balls of this quality you will find anywhere! Suitable for all Quads and a range of other vehicles.

Specifications:

- 1 7/8 x 3.4” – 16 UNF
- Chrome | Rated 2000kg (Zinc finish also available)

#380A   Tow Ball: Single   \$16.25ea
#380B   Tow Ball: 2-24   \$14.50ea
#380B   Tow Ball: 25+   \$12.30ea

QUAD TOW HITCH

Suits Can-am Quads

Heavy duty steel Tow Hitch, made in NZ. Powdercoated finish, and comes complete with Tow Ball and Locking Pin. The tow ball is a 1 7/8 size with a 2000kg rating. This Quad Tow Hitch can also be used on UTVs, but has been designed to fit Can-am Quads.

#414   Quad Tow Hitch   \$104.00

Toolboxes

V-FRONT TOOLBOX

Made in the USA

The new V-Front box solves the problem of visibility while maintaining style and storage. The better choice for those with high beam headlights on the handlebars, this box has 1.5ft³ of dry storage. The V-Front box is also key lockable, with a heavy duty steel latch, and also features a foam gasket and bright yellow reflectors.

Features include:

- **UNIVERSALLY FITS** all standard tubular ATV racks
- Ultra-durable high-density polyethylene will not crack, warp, or dent under extreme temperatures.
- Comes complete with parts for hard-mounting
- Better visibility & minimal reflection from high beam headlights
- **KEY LOCKABLE**, watertight & dust resistant to protect your gear
- 2-mold design offers superior strength
- Heavy duty steel latch provides tight seal with or without using key lock

Available in Black only

Exterior Dimensions at BASE surface:

- (A) Overall Length: 79cm
- (B) Overall Width: 41.5cm at centre
- (C) Center Height at Sides: 18cm front 21.5cm back
- (D) Center Height at V: 8.5cm
- (E) Interior Opening: 38cm(l) x 25.5cm(w)

#220 V-Front Toolbox - USA \$355.60

Accessory Map

HARD ROOFS

All hard roofs are made rotational moulded polyethylene. Not brittle so there's less chance of cracking on any impact.

PVC CLEARBACKS

Made from clear PVC, most models simply velcro around the ROPS making it fast to attach and remove if need be.

SIDE FENDERS

Made from strong clear polycarbonate, with each model having its own design. Attach to the TRAX steel windscreen frame, giving that extra bit of weather protection (like monsoons on a car).

MUDGUARD FLARES

Made from polyethylene plastic. Attach around the wheel arch to help contain excess mud.

WINDSCREEN KITS

All full windscreens are toughened safety glass with either rubber or PVC skirts to cover any gaps above or below.

WIPER KITS

Quality Italian motor. Some models mount through a hole in the glass, and other either above or below the windscreen. All wiper kits are supplied with the needed arm, blade, wire loom, and mounting bracket.

WINDSCREEN SKIRTS

Made from either rubber or PVC, designed to close the gap between the windscreen and bonnet. Some models also have one at the top, and all windscreens are supplied with the needed skirts as part of the kit. The lower skirt on some models can roll up and dome open to help with airflow.

Made in NZ to suit the agricultural environment

UTV Weather Protection

HARD OR SOFT-TOP ROOF KITS, GLASS WINDSCREENS AND FULL CAB OPTIONS FOR ALL POPULAR UTV MODELS.

TRAX windscreens are made in New Zealand to suit the requirements of agricultural life. The toughened safety glass used allows for a wiper kit to be fitted and with our replacement parts readily available it is an easy fix if you have the misfortune of a broken windscreen. For some models there is the ½ screen option, which are all made from 6mm UV stabilised clear polycarbonate.

TRAX roof options include a hard polyethylene plastic style for all models, and a soft heavy duty PVC style for some makes. These also are made in New Zealand with materials that can handle the harsh UV light.

THE TRAX WORKSHOP

At Ag-Tech, TRAX gear is manufactured out of three different departments. Beginning with the Engineers Workshop, raw steel is cut, bent and welded into parts and sent off for powder coating.

Then there is the Sewing Department where all PVC and soft material items are produced. And lastly the Fabrication area, where parts are assembled and dispatched.

These processes and the equipment involved, allows TRAX gear to be modified in an instant if need be, and development of new products can be done quickly 'in-house'.

USE NZ MADE

Why not get NZ made products when you can?

Some TRAX items fit in with offshore products, but using TRAX 100% gives you a lot more options.

These are just some of the great advantages of using TRAX gear:

- Replacement parts readily available
- Modification can be made
- Any issues are sorted quickly
- No orders too small
- Old designs still available
- Made to suit our environment

Carrier Boxes

'GEAR BOX' CARRIER BOXES

Not just a box, but an innovative, practical design that looks good, is waterproof, tough & has handy bungi cords on lid to secure objects like spades etc.

'GEARBOX' STANDARD:

This tool box is different to the conventional box, as it hooks onto the carrier or bull bar and sits clear of the quad (front or back) leaving the carrier free. The easy open lid is watertight and galvanized steel internal reinforcing brackets provide strength and rigidity to the whole box. Note: Designed for straight bull bars only.

Capacity: 830mm (l), 300mm (w), 300mm (h)
#98A   'GearBox' Standard + Brackets   \$428.25

FLAT BED 'GEARBOX':

The Flat Bed 'GearBox' is designed to sit on the carrier. Sits flat & doesn't need the hooks or internal bracket as standard box.

Capacity: 830mm (l), 300mm (w), 210mm (h)
#214   Flat Bed 'GearBox'   \$369.00

TURNBUCKLE MTG OPTION (recommended):

Stainless steel turnbuckles at each end hook onto the carrier for a positive, firm mounting.

#215   Turn Buckle Mountings (ea)   \$19.10

THE 'PACK HORSE'

The bin for maximum storage capacity! Made of ultra-tough Polyethylene plastic as our other bins and trays, these will last a lifetime of everyday use.

Features include:

- Extra length can take a standard size spade, shovel, fence standard, axe, spray, chainsaws, guns etc.
- Easy mounting options for practically any make of Quad
- Can be used on Ute decks, trailers or UTV carriers

Capacity: 1100mm (l), 280mm (w), 310mm (h)
Colours Available: Red, Green or Blue

Bungi cord mounting option: Use to mount the bin on top of the carrier, front or back where preferred.

Dual mounting bracket: Holds Bin off the back of carrier, leaving the carrier free. This bracket has pins for mounting to a C-Dax attachment.

#61   'Pack Horse' Bin Only   \$231.55
#54   'Pack Horse' Bin & Bungi Mounting   \$255.40
#58   'Pack Horse' Bin & Dual Mounting   \$428.10

Specialised Tool Holders

These specialised tool holders are designed to make carrying gear on your quad hassle free, secure and easy to access, saving valuable time and effort. Essential items for landscapers, lifestylers, farmers or anyone else who carries the same tools on a regular basis. Made by the same American manufacturer of the popular pack rack gun racks, ensuring proven reliability and quality.

‘SNAP GRIP’ HORIZONTAL:

Convenient holder for round handled tools up to 35mm in diameter. Horizontal option great for longer tools such as pitchforks, rakes etc

#461   **‘Snap Grip’ Horizontal**   **\$44.95**

‘SNAP GRIP’ VERTICAL:

Vertical option suitable for shorter round handled tools such as spades and can be mounted side by side to carry multiple tools at once.

#462   **‘Snap Grip’ Vertical**   **\$49.65**

STRIKING TOOL HOLDER:

Designed to carry hand striking tools such as axes, slashers, sledgehammers etc, with oval shaped handles.

Solid steel construction is built to last, protective rubber lips to hold tools secure and protected

#465   **Striking Tool Holder**   **\$93.35**

BUCKET HOLDER:

Bucket nests into curved steel rests, strong nylon straps and buckles firmly hold a standard 4 or 5 gallon bucket or similar item on your quad, front or back.

#460   **Bucket Holder**   **\$84.70**

FISHING ROD HOLDER:

Designed to firmly hold a standard size rod which can be easily be removed when needed. Adjusts to different angles for use when fishing from the quad. Available as a single or double

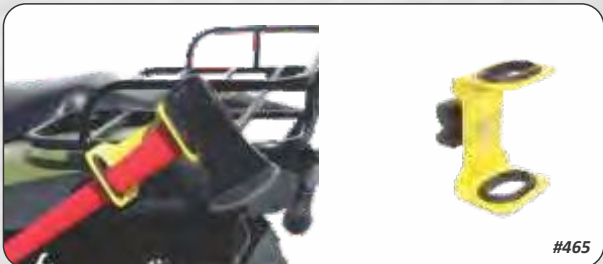

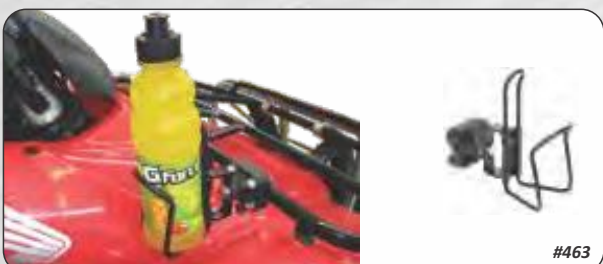

#464   **Fishing Rod Holder (Single)**   **\$69.15**

#464b   **Fishing Rod Holder (Double)**   **\$88.99**

DRINK HOLDER:

Keep your drink bottle within easy reach, a lifesaver in dry, hot conditions! Conveniently holds standard size bottles almost anywhere on the bike ensuring you stay refreshed and energised on the trail or at the farm.

#463   **Drink Holder**   **\$69.15**

Slipstream Dirt Bike Carriers

The SlipStream is a motorbike carrier or motorcycle rack, designed specifically to transport off-road, trail, enduro, motocross or farm bikes. There are two main options available – the ‘Alloy Model’ which a ramp can be used to load your bike, or the ‘Galvanised Model’ which you need to lift your bikes wheels into the holders. **Note: All individual parts are replaceable.**

The **‘ALLOY MODEL’** has 6 tie-down points, made from high tensile grade T6 aluminium channel. The Alloy Ramp (if supplied) simply attaches to the carrier when not in use. Steelwork is hot-dip galvanized, and there are two main mounting options to suit the style tow-bar you may have. Either a standard ‘Tongue Type’ or a ‘2 Inch Receiver Hitch’.

A Wheel Lock is an extra that can be added at any time. This is a great option if you need to load the bike on your own – as you wheel your bike onto the SlipStream, the Wheel Lock pivots forward, following the front wheel, and ‘locks’ your bike in place. Rated for carrying bikes up to 150kg. The carrier itself weighs between 25-30kg (depending on what mounting system you need).

ALLOY ‘SLIPSTREAM’ OPTIONS:

#810	Carrier only	\$439.99
#810a	Ramp only	\$110.10
#811	Carrier + Ramp	\$549.30
#812	Wheel Lock Upgrade	\$95.75
#814	Carrier + Ramp & Wheel Lock	\$640.85

The **‘GALVANISED MODEL’** has two sizes available and leaves the tow ball free if you still need to tow a trailer.

Rated for bikes up to 150kg, the **‘large model’** will carry bikes with a wheel base of 1230-1550mm. The **‘small model’** will carry bikes with a wheel base of 930-1230mm. The carrier is simply bolted to the tow bar, with the specially designed clamping system to eliminate twisting and then drop in the wheel carriers only when you carry the bike. To load the bike, you have to lift each wheel into the space that holds them.

GALVANISED ‘SLIPSTREAM’ OPTIONS:

#808	Carrier - Large	\$389.00
#809	Carrier - Small	\$389.00

The ‘SlipStream’ will carry all makes, including Honda, Yamaha, Kawasaki, Suzuki, Husqvarna, KTM etc. It is compact in size, making storage easy when needed, and a lot cheaper than a trailer if you only have one bike to cart – no WOF’s or REGO’s needed.

#814 Alloy SlipStream including ramp & wheel lock

#808 Large galvanised SlipStream

Mud Flap Kits & Guard Flares

MUD FLAP KITS & TOW HITCH

TRAX offers a simple and effective option to mount rear mud flaps to a range of UTVs. Most consist of a steel mounting bar which bolts to your machine, and the mud flaps hang from this or are fixed in place depending on the style deck.

The mounting kit (code #50) includes an alloy support bar riveted to the mud flap, and heavy duty straps bolted through the alloy and mud flap. Price includes alloy attached. This mounting system has been designed to fit to round bars or carriers, and allow the mud flaps to swing if need be.

MUD FLAPS		
#48	Med 335 x 620 mm (Pair)	\$45.00
#49	Large 380 x 620 mm (Pair)	\$49.00

Windshields

COBRA PROTEK

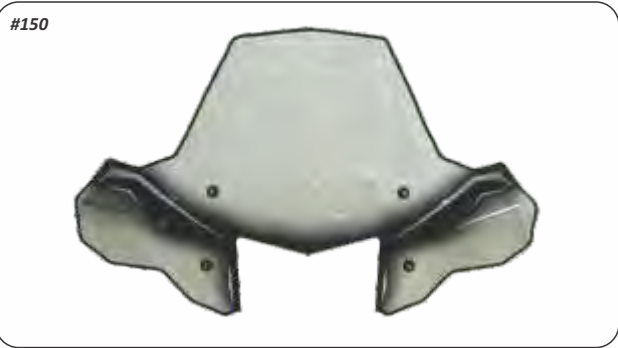

Made in the USA
The new Cobra ProTEK Windshield features an edgy design to match the latest quad designs as well as the old. The addition of ribs and contours give the ProTEK windshield added strength. You do not have to remove your Cobra ProTEK shield to trailer your quad as long as it faces forward. The ProTEK has a universal mounting kit and comes with or without a headlight cut-out.

NO MORE FITMENT ISSUES, the new mounts are more universal than ever allowing them to fit over 80% of current quad bikes. Our unique two-point mounting system is universal and makes installation quick and easy. Unlike some shields, you don't have to remove a Cobra shield to trailer your quad (quad must be facing forward). Cobra Windshields are made of high quality optical-grade polycarbonate featuring scratch-resistant surface and distortion free optics.

For fitment: Stand in front of your quad and if you can see the upsweep part of your handlebars this shield will work on your quad. The mounting brackets come straight out from the upsweep bars and will work even if you have a headlight pod.

Note: The ProTEK Windshields fit most models except for the Honda Rincon, all Bombardier models (except Rally), Kawasaki Prairie and Brute Force.

#150	COBRA Windshield	
	- With Headlight Cut-out	\$321.50
#151	COBRA Windshield	
	- No Headlight Cut-out	\$321.50

Quad & UTV Winches

A good winch is about the most important accessory a rider can have. Direct from the USA, the popular KFI winches are now available in NZ from Trax Equipment. Equip yourself with one of these and feel confident you can pull yourself out of any situation! Tested in all extremes and conditions these superior quality winches are guaranteed to give a long, reliable life of consistent use on your quad or UTV.

No compromise on value, packed with features and likely to be the most competitively priced, compact winch of this value you will find anywhere – compare with other brands!

Available in: 2500lb, 3000lb, 4500lb

Features include:

- 12V DC, 1.1 - 1.7hp permanent magnet motor
- All metal planetary gear drive
- Handlebar mounted switch
- Hand held remote switch (ex 2500lb)
- Free spooling, all metal cam activated clutch
- Multi-directional fairlead roller
- Roller fairlead mounting plate
- Power in and power out
- All necessary power cables
- Removable steel hook
- Pull strap
- 12 month Ltd warranty
- 11 – 14m steel cable

#373K	KFI WINCH 2500lb	\$578.99
#374K	KFI WINCH 3000lb	\$649.00
#375K	KFI WINCH 4500lb	\$890.00

Optional Extras:

4 TONNE SNATCH BLOCK: Double your line rating! Provides a double purchase pull for those heavier machines, highly recommended as an add-on to your winch package.

#583K	4 Tonne Snatch Block	\$49.55

CABLE HOOK STOPPER: Eliminates wear and tear on your rollers from the hook. Keeps tension on the hook to eliminate the cable becoming loose.

#379A	Cable Hook Stopper	\$29.05

Model specific mounts:

Now available for a wide range of the popular model Quads & UTV's, see full list on next page.

UTV Lights

LED STRAP LIGHT

- 5 High Powered LEDs
- Sturdy, Weatherproof Housing

The UTV Cab Light has plenty of light provided by the 5 high power 1 watt LEDs to light up your cab in early mornings or late nights. Use it to help you find your keys or tools easily. The housing on the strap light is designed to work in all types of weather. The high impact lens is designed to take a beating and keep on shining!

- Universal fit
- Simple 1 button operation
- 5 x 1 watt LED bulbs
- Includes 3-AA batteries
- Water resistant housing
- Rubber grip strap holds it in place at any angle
- Adjustable Velcro strap fits any UTV ever made
- Can be mounted vertically, horizontally, and diagonally

#907	LED Strap Light	\$69.00

ROOF MOUNTED SPOT OR FLOOD LIGHTS

Available with single (mono) or double (twin) bulb options, the 'E-power' work lights are a stylish top quality brand. They come with a universal mount for all types of UTVs with a plastic roof, or optional mount for roll frame mounting.

Please specify SPOT or FLOOD preference when ordering

These are an economical alternative and a good entry level light. Additional mountings are available to bolt directly to the roll frame for UTV's with no roof.

#488	Twin Beam Spotlight	\$170.00
#489	Mono Beam Spotlight	\$113.95

UTV Mirrors

UTV Heavy Duty Side Mirrors (Pair)

Huge mirror surface provides excellent visibility; breakaway design allows it to deflect hits from obstacles like stray branches. Mirrors fold back for tight clearances.

Features include:

- Strong and durable steel clamps
- Super tough housing resists damage
- Fits any 45mm bar
- High visibility
- Increased manoeuverability
- Wide range of adjustment
-

Note: Mounting brackets made to suit a 45mm bar, but can be fitted to smaller sizes if need be.

#18041 UTV Heavy Duty Side Mirrors \$197.30

UNIVERSAL UTV MIRROR

Mounts anywhere: Customers sometimes buy 2 - 3 of these mirrors because they can mount them anywhere! They buy one for the rear view, one for the left side and one for the right side

Mounts to a variety of vehicles: These mirrors can be mounted on a variety of vehicles. Customers buy these mirrors to stick on their boats, tractors, or any other equipment they have.

Shatter resistant: These mirrors can really take some abuse because they are tempered and made from high impact plastic.

With 3 different mounting sizes, this covers most if not all ROPS sizes on the various makes of UTVs.

3 different mounting sizes as below:

#777 Universal UTV Mirror (40mm) \$48.75
#778 Universal UTV Mirror (45mm) \$48.75
#779 Universal UTV Mirror (50mm) \$48.75

Winch Mounts & Parts

Model specific winch mounts now available:

Make your job of mounting a winch to your quad or UTV a far easier and quicker task. American made powder coated black steel construction, they quickly and accurately bolt into the space provided on the bike and also have provision to mount the fairlead rollers. Prices vary accordingly to the different designs and sizes necessary to each model. These mounts are suitable for most brands of winches with the standard 4-hole bolt pattern.

CRUSH PROTECTION DEVICE - SAVES LIVES

A WORLD FIRST in Quad Safety

Revolutionary, flexible & lifesaving crush protection for quad bikes

WHAT IS THE LIFEGUARD™?

The LIFEGUARD™ is a revolutionary quad bike rider crush protection device that could possibly save you or your loved ones life. The LIFEGUARD™ is passive, flexible, yielding, instead of hard and rigid. The segmented construction is a new concept and has the ability to deflect around a person's body, limbs or head-on impact. It cannot collapse or flatten and will support a quad off the ground and help to provide crush protection for the rider.

WHAT IS THE LIFEGUARD™ MADE FROM?

The LIFEGUARD™ is basically made from an aluminium base with plastic segments forming the arc. Tensioned cables hold the segments together which can be adjusted if needed. A neoprene cover zips over the segments, giving added protection and padding if coming in contact with the rider.

HOW DOES THE LIFEGUARD™ ATTACH?

The LIFEGUARD™ simply clamps to the rear carrier of your Quad, fitting most makes and models. Severe roll over testing has proved that this method is highly effective as the flexible character of the LIFEGUARD™ soaks up the impact, and the carrier can easily sustain the forces required.

WHERE DO MY DOGS SIT?

Dogs love the LIFEGUARD™! If you have a rubber mat, this can be placed over the LIFEGUARD™ base, and there is plenty of room for 2 or 3 dogs. Instead of leaning on your back, they lean on the LIFEGUARD™.

WHERE DO I PUT MY SPRAYER & HAY BALES?

Some sprayers will mount on the front of your quad, and depending on the size some can still fit on the back with a LIFEGUARD™ attached. Otherwise the LIFEGUARD™ can easily be removed if need be while spraying. Hay bales—you may need to take a trailer depending on the size bales.

IS THE LIFEGUARD™ CERTIFIED?

The short answer is yes. Currently there is no Standard for CPD's on quad bikes, but the LIFEGUARD™ has been certified by engineers to meet the closest standards possible, and to ensure the components can handle the forces that could come against them. The LIFEGUARD™ is currently being used in research to develop a Certified Standard for crush protection on quad bikes.

WHY IS THE LIFEGUARD™ FLEXIBLE?

This is the key reason why the LIFEGUARD™ has been developed. Years ago quad manufacturers banned roll bars because they claimed the bars themselves were dangerous. The LIFEGUARD™ totally flaws these arguments in the fact it is flexible – not a rigid bar. The LIFEGUARD™ has been designed to help prevent the most common cause of injury on quads.

UTV Gun Racks

TRANSRACK - SINGLE OR DOUBLE

These sturdy gun racks have special telescopic mounting clamp arms, adjustable to fit any width or angle roll frame on a UTV.

- The Single can be doubled up, one on top of the other for two rifles
- Inside or outside of roll frame
- Along the top or above your head
- Rubber-coated hooks safely grip rifle & can be spaced to suit
- Rubber snubbers hold them tight and secure.

The main construction is made in NZ, and quality USA made Gun Holders finishes this piece of kit off right ready for action!

#493	TransRack - Single	\$265.00
#493B	TransRack - Double	\$310.00

UTV GUN & BOW HOLDER

It's called the UNO™ because one mounting spot is all you need! The Master Block™ mount needs to attach at only one place on any UTV bar up to 1 3/4" in diameter so you don't need to worry about finding two spots just the right distance apart.

Easy to attach and adjusts quickly to fit your gun or bow because the holders can be slid to the correct width and tightened to a custom fit for whatever item you need to carry.

Unique compression rubber honeycomb cushions on the inside of the holders keep your gear held tight. Rubber snubbers included.

#515	'UNO™' UTV Gun/Bow Holder	\$129.00

UTV GRAB HANDLE

This grab handle is an extremely durable solution for adding a stable grip to your UTV. The steel construction provides a stable grip. It's easy to take it on and off due to the simple but heavy duty Velcro strap. Rubber pads keep it from sliding and twisting while driving through the roughest terrain or entering and exiting the UTV.

- Heavy duty steel handle
- Comfortable rubber grip
- Simple but heavy duty Velcro strap makes it easy to take on and off
- Place it anywhere on your UTV's roll bar
- Fits 40mm to 50mm Roll Bars

#776	UTV Grab Handle	\$53.90

UTV Front Carriers

YAMAHA RHINO FRONT CARRIER

- All steel construction
- Fits all Rhinos
- Brush guard provides partial frontal protection
- Rear and side basket rails to help contain items
- Quick release mechanism requires no tools

#789   *Rhino Front Carrier*   \$580.00

YAMAHA VIKING FRONT CARRIER

- All steel construction
- Fits all Vikings
- Mounting plate for light bar
- Rear and side basket rails to help contain items
- Easy placement and removal, no tools required
- All new latching system

#788   *Viking Front Carrier*   \$599.00

POLARIS RANGER FRONT CARRIER

Full & Mid Size Pro-Fit Rangers 2015+

- Adjustable tilt angle
- Mounting plate for light bar
- Multiple attachment points for hooks and straps
- Mounts easily with no drilling required
- Steel construction

#786   *Ranger Front Carrier*   \$599.00

KUBOTA RTX-X 900 & 1120D FRONT CARRIER

- All steel construction
- Mounting plate for light bar
- Rear and side basket rails to help contain items
- Adjustable tilt angle
- Quick release mechanism requires no tools

#787   *RTV-X Series Front Carrier*   \$599.00

LIFEGUARD®

Ag-TECH Industries

WHAT'S YOUR LIFE WORTH?

The Benefits

Of Flexible Crush Protection

The major advantage of the LIFEGUARD™ is the fact it is flexible. It has been designed so there is enough flexibility in it so the unit itself won't cause harm if coming in contact with the rider, but it can't collapse and still provides space under an upturned quad.

If coming in contact with the rider, the 'flex' that is in the LIFEGUARD™ is soaked by the object it hits and the rest of the arc tensions up which takes the weight of the quad off rider or object. This key feature will help stop the most common cause of death from rollovers – asphyxiation. One of the tests involved a 360kg weight pushing the LIFEGUARD™ over an object the same size as an average human. Under this a pressure pad proved this was not only a theory but actually worked, with the crushing weight of 360kg transformed into an average of 25kg pressure on the rider. This is the total opposite to a rigid roll bar, or no crush protection at all, where the full weight of the quad can be concentrated on one point.

Because of the shape, it doesn't matter what part of the arc hits you if this does happen. The quad will either continue to roll or if you are trapped underneath, because of the flexible nature and shape of the LIFEGUARD™, and as a result of lifting the centre of gravity of an upturned quad, it helps to push the quad off you or back onto its wheels.

If you do roll, the LIFEGUARD™ simply springs back into shape. Depending on the extremity of the roll, the LIFEGUARD™ may need to be tensioned slightly which is easily done with the adjustable torque setting on the side. Although the shape looks like it would make a quad roll further, because the LIFEGUARD™ is flexible, it flattens off to the shape it comes in contact with, therefore slowing or stopping the roll.

Read over the page about the first life a LIFEGUARD™ saved.

FLEXIBLE CRUSH PROTECTION SAVES LIVES

Read the full story direct from a lucky LIFEGUARD™ owner...

Aedan with his LIFEGUARD™

“As in the past we have mounted the “T” bar on our quads I feel the bike that night having one of those would have landed on me pinning me to the ground and potentially crushing me under it”

Aedan's LIFEGUARD™ in Chile

Hello Vernon,

Well I have had my first experience rolling a quad bike. I have installed your life saver roll bar for just over one month now, I am living in Chile dairy farming here. I had my mother bring over the roll bar at the start of February 2013 which I hear would have been the very first sold. I have a 500cc Honda quad which I bought last year and have had for around five months and it has already done around 4000km, as the farm I own and lease is large we use the quad all-day every day.

I have never experienced a quad roll on me before and I can surely say if I didn't have this roll bar and how it is formed, I would either be dead today or in hospital.

What I was doing before it rolled was looking at 11pm at night on my farm for the neighbour's horse which had escaped. As part of my farm has an elevation of 140m to 200m above sea level it is dangerous in some parts. I was coming down a narrow stock track which is rough and unlevelled and steep standing up on the quad travelling around 30km / hour with a spot light in my left hand and my right hand steering. I dodged to the right to miss blackberry which was hanging over the track but only to clip the right front wheel on the bank pulling the steering in my right hand towards me causing the bike quickly to flip downhill to the left, throwing me off in the direction it was about to roll. **I rolled off crouching on the ground knowing the bike was coming next, the life guard supported the back end of the bike in the air as it rolled in the pitch black darkness over top of my head and back slightly squashing me underneath.** After it rolled over me it landed back on all four wheels still running. No damage to the bike as on the front I have mounted a plastic carry box which saved the handle bars from being bent.

As in the past we have mounted the “T” bar on our quads I feel the bike that night having one of those would have landed on me pinning me to the ground and potentially crushing me under it, especially dangerous at that time of night with no one knowing where you are and living alone. I say thank you for a great product which has allowed me to keep farming and learn from my mistakes without serious consequences.

Regards, Aedan Bryan | Chile

These are the exact words sent from Aedan to Vernon who developed the LIFEGUARD™. Even after the extensive testing taken out on the LIFEGUARD™ to prove it would work, it was great news to know it did what it had been designed for in a real accident - flexible crush protection that doesn't inflict serious injury itself. This is revolutionary and no doubt many more will benefit from it. The LIFEGUARD™ is like a seat-belt in a car - it may not always be effective, but generally you will be a lot safer with one.

WHY WAIT UNTIL IT'S TOO LATE?

**Can you afford a week or more off work? Or even worse, a funeral?
Plan for prevention rather than problems to save time and \$\$**

Read this real-life story, how the LIFEGUARD™ saved this farmer from serious injury and saved his life!

Throttles & Wheel Spacers

QUAD BIKE HANDY THROTTLE™

The Handy Throttle™ can be used on 4-wheelers, jet skis and snowmobiles that have a standard 7/8" handle bar and a thumb throttle.

The Handy Throttle™ allows anyone to quickly and easily switch from a thumb throttle to a twist throttle. It does not change the mechanical function of the thumb throttle. Therefore the driver can revert back to the factory throttle by simply removing the Handy Throttle™.

It is made with a high quality ABS plastic that withstands extreme temperatures and is resistant to UV rays. Once installed, the Handy Throttle™ can be covered with a rubber grip that is supplied with each Handy Throttle™.

QUAD WHEEL SPACERS

Simple and effective option for that little bit of extra stability you need in those tricky situations.

At 60mm wide per spacer, this increases your wheel base by 120mm – this may be the deciding factor whether your quad rolls or not!!

Designed for the rear wheels only.

By only increasing the wheel base by 120mm, your quad will still easily fit onto the deck of your UTE or trailer, doesn't chuck much more mud around than usual, and is still narrow enough to continue driving on the tracks you always have.

Supplied as a pair, along with all need fittings to attach. May not fit all makes of quad.

Made in NZ and Zinc coated for extra protection against corrosion.

Ag-Hat

QUAD BIKE HELMET

The known quad bike helmet, made in NZ, and is an economical option to meet the new laws and needed requirements.

The Ag-Hat is built to comply with New Zealand NZS8600 safety specifications:

A versatile, lightweight helmet designed to meet the needs of the farmer in all elements.

- Rugged construction
- Fully ventilated shell
- Multi-fit: Adjustable to fit most head sizes
- Optional add-ons available: Ear Muffs, Face Shield, Neck Curtain and Sun brim

Note: To fit Visor, Ear Muff attachment must also be fitted.

#358	Ag-Hat Helmet	\$139.00
#359	Ear Muff Attachment	\$110.00
#365	Face Shield Attachment	\$46.60
#366	Neck Curtain & Brim	\$69.15

TYRE SEALANT - 'TYRE GUARDIAN'

Maintains pressure and stops flat tyres!

It is absolutely essential your tyre pressure is even and maintained, and 'TyreGuardian' is the answer. Seals holes in tubeless tyres caused by puncturing objects up to 6mm diameter, which appear in the tread area of the tyre as the vehicle is driven.

Prevents rust, heat build-up, seals porous leaks, maintains tyre pressure, and does not affect tyres or rims. Helps to extend tyre life by the combination of maintaining correct balance, and the prevention of heat build-up in the tyre.

Water based product so it can be hosed out the tyre if work needs to be done on your wheels.

A 1L bottle is enough for 4 standard quad tyres. It can be used in car, truck, 2 wheelers or even your wheel barrow tyre!

LASTS THE LIFETIME OF YOUR TYRE AND SUITS TUBED & TUBELESS TYRES.

#LGTG1	'TyreGuardian' 1L	\$45.00

LIFEGUARD™ SHOP

Available direct or through your M/C dealer

If you were injured, under a 350kg quad, would you be able to lift it?
With a LIFEGUARD™ it is actually possible!

The LIFEGUARD™ is the most effective but simple option to meet the dangers quad bikes bring. Fast to fit and fits most makes. Prices and options below to help make your workplace a safer area and giving you the chance to take the extra precautions needed for quad bikes. Why not when you can?

Helmets

TERRAIN MULTI-ROLE HELMETS

NEW

HIGH PERFORMANCE
MULTI-ROLE/ATV HELMET
A helmet that you want to wear

If you have to wear a helmet, why not wear the best? This ‘TERRAIN’ Multi-Role Helmet is a high performance option with the facility to fit a variety of accessories. The helmet has a high level of impact protection which gives the wearer excellent protection from impact/shock both from above or from the sides.

The ‘TERRAIN’ is tested to a number of different standards giving it the versatility to be used in a wide range of applications.

Where other manufacturers put cost before performance, ‘TERRAIN’ puts wearer protection and usability first.

SPECIFICATIONS

Impact Protection:

- Shell= 100 joules
- Side / Front / Rear = 25 joules

Weight and Thickness:

- Shell= 3 - 6mm
- Liner= 18 - 22mm
- Helmet= 550 grams

- 2 year warranty
- 10 year life
